How to Make a Folding Fan

Supplies:
3 pieces of colored paper or scratch paper (8.5”x8.5”), glue, 2 flat sticks (¾”x 6”) or Popsicle sticks

How to:

1. Lay one piece of colored paper on a table and fold it in half. (If you want to decorate the paper, you can use markers or color pencils before you fold it in half.)

2. Continue folding the paper in half 3 more times to make creases (about a ½” crease).

3. Unfold the paper and fold the edges again alternating inwards and outwards along the crease.

4. Fold the paper in half by length.

5. Follow the above procedure 1-4 for the remaining 2 pieces of colored paper.

6. Glue the end surface of each folded paper and hold them to put together.

7. Glue the two open ends of the folded paper and attach flat sticks to each open side of the paper.

8. Fold the fan and carry it around.

Enjoy the fan and stay cool this summer! 😊
