From: **How to Make Simple Box Pop Up Cards**

- Fold a piece of card stock paper in half. On the outside of the folded card, draw one or more rectangles of any size, where one side of the rectangle is the center fold of the card. Here I have drawn three of various size.
- Cut the rectangle sides that are perpendicular to the fold (shown as solid lines).
- Score (crease) across the top of the rectangle (dotted line).
• Create the fold lines by creasing the flap up, then uncreasing.
• Flip the card over and crease the flap up on the other side, then uncrease.
• Open the card to 90°. From the back, push the rectangles with your finger to pop them forward.
Origami Base for a Circular Star Book and a Cascading Book

Video link: https://youtu.be/XsOK9mOTPWA

1. Fold a square in half, open, then fold in half the other way, thus dividing the square into fourths.

2. Tilt the square, then flip it over. The folds will be like mountains. Having the folds sticking up like this will seem awkward.

3. Bring the top fold down to the bottom and crease.

4. Open the paper so the diagonal fold is like a mountain.

5. Push down the center of the paper. It may seem to “pop” down.

6. Push the side points in towards the center. This is one base. Make a few more.

Circular Star Book

Make four bases. Keep them closed but orient them in the same direction so that the opening is facing forward. Keeping them closed, glue one on top of the other until the four bases are glued together.

The book will open circularly; from the top it will look star-like.

Casacading Book

Glue together an odd number of bases so that their openings are facing in opposite directions.

The book will close up into a deceptively small square, but it dramatically unfolds into a long book.
